### Rumors About Harriman Influence Market.

#### LONDON AFFECTED BY REPORTS

Sales in Lots of 100 to 500 Share Said to Indicate Forced Liquida tion of Weekly Margined Accounts. Strength of Steel Stocks Served to Steady the Exchange.

New York, Aug. 28 .- At the opening of the market to-day, Union Pacific, New York Central, and Southern Pacific sold at prices well below yesterday's closing Most of the traders seemed to be alarme over the reports in many of the morning papers regarding Mr. Harriman's health, and heavy selling orders from London indicated that there, too, the condition of his health had not been entirely discounted in the stock market."

The selling of Union Pacific continue until the stock was more than five points below yesterday's close. Trading was active, but it was noticeable that not so many big blocks came out as on prevlous days.

Forced Liquidation Shown. A far greater proportion of sales was in lots of 100 to 500 shares, a circumstance that may indicate the forced liquidation of weakly-margined accounts held in brokerage offices, and show a cessation

of the more important liquidation than

of large holding by men of wealth, In the middle of the session, a vigorous denial was given to reports that Mr. Harriman was about to undergo an operation, and in the last hour a better feeling in regard to the Harriman stocks seemed to prevail, although, of course, the gain in the last hour was due partly to the wide and customary covering of short contracts at the end of the week's

The Harriman stocks excepted, the market acted better after the early trading than at any previous time since the break began. The strength of the Steel shares was particularly impressive, and served greatly to steady the market as a whole, and imparted stability to other industrial stocks and to the stocks of railroads with which Mr. Harriman is not connected.

The bank statement indicated, as did the bank statement last week, heavy liquidations of stocks by men of wealth, who purchased them in the spring and early summer at prices well below those prevailing even after as violent a break in stocks as has been seen this week, as who financed these purchases to a co siderable extent with time money,

The clearing-house banks in the a erage statement reported an increase \$1,400,000 in loans, and the State bar and trust companies showed an increa of more than \$8,000,000. As has be pointed out previously, a contraction of loans is ordinarily expected after a period of liquidation in the stock market.

#### Purchases Below Mark,

But the circumstances recently have been different for the reason that the purchases of many large holders of securities were made so far below currer prices for stocks that not so much coul rrowed on them at the time of th purchases as could be borrowed by thos who have purchased these same stock

in the last two weeks. There has, of course, been in the pas week much liquidation of stocks bought at higher prices, but this circumstance emphasizes the magnitude of the realizing sales by the holders of big blocks.
